

**One Team, One Vision**

## ROPE ACCESS SERVICES

### What we do?

At Hidramar Group, we provide high-quality support on fabrication and repair services to the Naval and Oil and Gas sectors. Well equipped facilities, strong project management and logistics allow us to fulfill our commitments with our Clients on due date, delivering the expected quality.

### IRATA Certified

We have the most recognized certification of vertical works at the international level IRATA International Rope Access Trade Association with the member number 5080 / O. It certifies and audits annually the safety requirements for work at height. In addition our team has the BOSIET and GWO certification.

All this to meet our goal of 0 incidents and accidents.

## Rope Access Technicians

Our rope access technicians have a strong experience on safely executing, works in areas of apparent difficult access, following the strictest safety precautions. Our technicians can perform jobs like:

- 6G approved welding (GTAW, SMAW, FCAW GMAW).
- Hydraulic and Pneumatic mechanics.
- Non Destructive Testing (NDT).
- Industrial cleaning.
- Labeling and painting.
- Roofs and metal fachades..
- Crane maintenance.
- Inspection and Repair of Blades.
- Installation and change of phenolic..
- Lifelines and protective nets installations.
- Installation of fireplaces and heat-insulation.

## Certified Procedure

We have welding procedures approved by DNVGL, ABS, BV and ABS under both European and American regulations in ISO, AWS and ASME.

Regarding the anticorrosive protection procedures (jet and paint) we have FROSIO inspectors, according to the Norwegian standards NTS 476.

For the Wind Generation Sector we have within our Team qualified technicians GWO certified for blades repairs and inspections.

Non-destructive tests for welding and painting procedures have been developed according to ISO standards and could be adapted to other international standards.
