

SHIPYARDS

One Team, One Vision

HIDRAMAR GROUP HOLDING COMPANY

We started in the 80s as a family-owned repair hydraulic workshop in Las Palmas Port. Hidramar group soon became recognized in the region for its quality service, its commitment to the clients and its cost-effective policy.

As the requirements of the clients challenged us, we developed different inhouse services, expanded our facilities and built a qualified team to set our brand as the most efficient shipyards in the region.

VISION & MISSION

Our vision

To become a preferred shipyard partner in the Canary Islands, Atlantic Ocean for the Global Energy and Marine industry.

Our mission

To provide cost-effective and efficient offshore project management, marine engineering and quality shipyard general services to our valued clients globally through our highly skilled internal staff.

QUALITY, HEALTH, SAFETY, ENVIRONMENT AND SUSTAINABILITY

Hidramar Group operates a comprehensive integrated quality and HSE management system. We are constantly seeking to improve and to ensure that our organizational structure keeps up with other leading international companies standards.

Our quality Management System is based on ISO 9001:2015, our Health and Safety Management System is based on ISO 45001 and our Environmental Management System is based on ISO 14001:2015, all certified by Lloyd's Register.

As our people is the heart of our business,
our commitment goes further.

Diversity, gender Equity and social Inclusion

It is not just an aim, but a global business policy. It is about our Group welcoming the talents and ideas of people with different backgrounds, experiences, and attitudes to encourage our continued success in providing clients with the high-quality service they deserve.

Global Responsibility & Sustainability

Our team consciously works together to protect the environment and have a positive impact on the communities where we live and work. We have internship programs that allow us to collaborate with local and international universities, improving opportunities to young people.

Hidramar Group Green

We continuously work to recognize and promote more sustainable alternatives through operational efficiencies, all in an effort to manage and reduce Shipyards effect on the environment.

HIDRAMAR SHIPYARDS

Reina Sofia (ISPS), Las Palmas de Gran Canaria

In the third quarter of 2017, we completed the construction work and redevelopment of our existing aggregate holding zone. We have created our new secure world-class ISPS quayside facility located at Reina Sofia Dique in Las Palmas de Gran Canaria.

Free-Trade Zone, Las Palmas de Gran Canaria

Hidramar Group's early steps were developed on the free trade zone located within the concurred Las Palmas Port. Well-capable machining and mechanical workshops on a side of logistics yards are in place to deliver a broad variety of services for the naval and energy sector.

TENERIFE SHIPYARDS

Free Trade Zone at Dique del este (ISPS),
Santa Cruz de Tenerife

Tenerife Shipyards management office and fabrication yard are located in the deepwater and well-sheltered port of Santa Cruz de Tenerife, alongside containers Terminal with direct waterfront access for shipyards operations.

TENERIFE SHIPYARDS

Granadilla Port

Just 10 Km from an international airport, this new Port offers the unique set-up with deep water piers and thousands of meters of yard space for great scale project execution. Tenerife Shipyards has been delivering several projects on this location during the last years and is currently investing to set a world class base to keep expanding its shipyards capabilities while becoming a world reference for offshore assets fabrications.

We deliver turnkey solutions since the feasibility study up to the final commissioning. Relying in our inhouse **3D Scanning and modeling, Solid Works Model and Design, Structural analysis and Detailed Engineering.**

While the execution, our project management, cost controller and procurement team efficiently drive our efforts until the successful delivery. Without mattering the SoW complexity, our multidiscipline engineering team makes the difference to cover all the branches related to the naval and Oil & Gas sector.

POWERFUL ENGINEERING AND DESIGN

A combination of know-how, cutting-edge technologies, outstanding facilities and full commitment to safety and quality standards are the strengths of our Engineering Department.

As the major demand of the naval sector is swift and effective solutions, engineering is basic to successfully undertake any project safely all the way through, within the expected time on the allotted budget.

RETROFIT, MOB AND DEMOB

Oil and Gas experience to fulfill the standards for any modification projects without matter size or location. The trust of our demanding Clients have positioned our Group as one of the best options for this kind of services.

Aware of the challenges involved with the ongoing changes in environmental policies, **we have developed solutions for air and water pollution controls.** Is our engineering and shipyards inhouse capacities what differentiate us; openly working closely with different manufacturers and compliant with Class Societies that enables to deliver turnkey projects on the committed time and budget.
